

Architectural Reference Working Group

Meeting Minutes

21 October 2021

Attendees: Russ Warren, Duncan Sparrell, David Kemp, David Lemire, Mike Rosa, Forrest Hare, Andrew Beard, Dee Schur

Agenda:

Here is the agenda for our call Thursday.

(1) Continue working on the mapping the OCA architecture to OpenC2

We discussed mappings of the OCA architecture diagram and use cases to OpenC2. We have an updated document that maps to the EDR Actuator profile and identifies what OCA needs and what will need to be extended in OpenC2. Dave Kemp prepared an additional table to provide more clarity. We identified several areas for the OCA ontology work group to assist us on. The following suggestions were made to update the table:

- Add a row for missing targets (ex. Add Domain and URL)
- Add a column for missing actions (ex Scan)
- Color code the circles (traffic light)

We will continue to map the OCA use case to OpenC2.
