**1.) OCA webinar update & marketing plan - 22 Sept., 11:00 AM EDT**
Registration form is up and live now. Jane will send links to marketing list. Start promoting now!
Two pending speakers, others confirmed.
Update: The webinar information has been posted/linked includes:

-via [Go-to-Webinar](#)
-on [Twitter](#)
-on [Facebook](#)
-on [LinkedIn](#)

Each webinar will highlight 2-3 Sponsors, so they can receive visibility and recognition.

**2.) Submitting speaking proposals for 2021 events - most urgent: RSA CFP deadline is18 Sept.**
**Shared list of 2021 events:  [https://drive.google.com/file/d/1FiLfai9TgG-PDLz32nZvwstHBKEd1YcE/view?usp=sharing](https://drive.google.com/file/d/1FiLfai9TgG-PDLz32nZvwstHBKEd1YcE/view?usp=sharing)**
Tricia: RSA 2021 moved to May and will be in person in San Francisco + virtual component. Jane confirmed 18 Sept is the current deadline. Who to submit CfP, who to present?
Need volunteer to draft submissions. Any volunteers? Jason: PGB discussed idea about seeing if there's a track or session or subject matter tracks in same room dedicated to a topic set, and all speakers are on that topic, so audience doesn't have to move around, could OCA members / OASIS host a track on Open Security, featuring speakers from OCA, STIX, CACAO...
Jane is trying to see if it's possible to host a pre-conference day, which used to cost $$$, but they won't decide until Oct.

Panel on Open Security, perhaps hosted by an analyst.
Anshul: show how STIX Shifter and OpenDXL Ontology can work together in a SOC environment.
Pitch Open Security track to events in addition to RSA.
**3.) Blogs - call for volunteers**

**4.) Announcements and/or press releases a) SCAP and b) First STIXShifter connector accepted**
SCAP: continuous monitoring, NIST, MITRE, DoD; they look to OCA as the interoperation layer. Fits with our architecture. One of the most important things, every system secured in the US federal government has to be secured with SCAP, and also used worldwide, very important in vulnerability management space, tells you if your assets are uptodate, patched, everything from a policy perspective. The news is not that the SCAP standard itself is moving to the OCA. This is the reference implementation for SCAP 2.0 will be developed in the OCA. NIST and DoD funds MITRE to do the implementation, which will be done in OCA. Carol to loop Cassy in on plans and to share pr draft when ready.
Dee to provide Anshul with Red Hat contact for OpenSCAP.
Get AlertFlex to write blog on STIX Shifter connector that we can promote via OCA

social channels.

**5.) Other business**
STIX Shifter five videos underway by Roseanne that we can post on the OCA YouTube channel. Promote via blog on LinkedIn. When videos are done, then host a workshop on how to develop a STIX Shifter connector.
